PROJECTS

Online Book Store Development Project: Developed a feature-rich and user-friendly online bookstore platform leveraging a combination of front-end and back-end technologies.

MyBlogG (Blog Website): Developed a dynamic and visually captivating blog website, leveraging HTML, CSS, and JavaScript to create a seamless user experience. This project focused on implementing responsive design principles and incorporating animations and transitions to enhance user engagement and interaction.

Online Entertainment and E-Commerce Platform Clones: Developed clones of the popular platforms BookMyShow and Amazon, showcasing my proficiency in front-end development. These projects focused on replicating key features of the original platforms.

Stock Market Prediction Model Using LSTM: Executed a cutting-edge project utilizing Long Short-Term Memory (LSTM) neural networks to forecast stock market trends and predict the future stock market prices.

Calculator, Temperature Converter, and To-Do List: Designed and developed interactive web applications - a calculator, temperature converter, and a to-do list - using HTML, CSS, and JavaScript.
